I wish to address every person living on this planet.. to enter into dialogue with all people about our common home...

The climate is a common good belonging to all and meant for all... Christians need an 'ecological conversion' whereby the effects of their encounter with Jesus Christ become evident in their relationship with the world around them. Living our vocation to be protectors of God's handiwork is essential to a life of virtue; it is not an optional or a secondary aspect of our Christian experience.
